

CHRISTIAN MOMDJIAN

(818) 641-4054 ▪ chrismomdjian@gmail.com ▪ chrismomdjian.com

OBJECTIVE

Junior developer position where I can become an expert in Python, JavaScript, PHP, MySQL, and all things related to tech while being loyal to a company for many years and helping the company obtain its goals.

SKILLS

HTML5, CSS3, Bootstrap, JavaScript, jQuery, Python, Flask, PHP, SQL, Object-Oriented Programming, Git/Github (version-control), Linux OS, and verbal/written communication.

EXPERIENCE

Wordpress Developer (Remote, Part-time) ▪ November 2016 – Present
EZ Marketing Concepts ▪ *ezmarketingconcepts.com* ▪ Los Angeles, CA

- Created websites for multiple clients using the Wordpress CMS and plugin system.
- Added HTML markup and CSS styling to personalize websites for each client.
- Made sure to finish projects within same day/next day of assignment unless project is large.
- Gained experience with basic SEO principles such as internal links, text-readability and relevance, and easy-to-find call-to-action ui buttons.
- Created sites such as: *presnow.com*, *quickcleanoutschicago.com*, and *gogojunkremoval.com*.

Jr Full Stack Developer Intern ▪ December 2016 – February 2017
Higher.team ▪ Culver City, CA

- Interned with senior developers.
- Added select2 jQuery replacement for select boxes to KidBank rails app.
- Made a custom PHP/MySQL scheduling software system.
- Did tasks via slack which a senior engineer assigned to me.
- Never gave up or threw in the towel on any tech assignment, (I Google often).
- Read lots of stackoverflow.com questions and answers to find solutions.

Web Developer ▪ August 2016 – January 2017
Genie Air Conditioning ▪ Van Nuys, CA

- Maintain websites *airconditioner.com*, *indiecharts.com*, *hiphop.net*, and *easylisting.com*.
- Fix issues with media players and online mp3 upload forms on *indiecharts.com*.
- Updated MySQL with pricing and specifications for air-conditioner units.
- Created HTML5/CSS3 and Bootstrap webpages under various domain names owned by Genie AC founder such as *olmominisplits.com* and *heatpumpminisplits.com*.
- Wrote MySQL queries against a relational database.

EDUCATION

Glendale Community College – *Associate in Web Development/Programming* – 3.8 GPA

Relevant Coursework: Python Programming, Java Programming, PHP and MySQL, HTML5 and CSS3, UNIX/Linux Operating System, Web Scripting w/ JavaScript and jQuery, Introduction to Computer Networks

Options for Youth Charter – *High School Diploma*

PERSONAL PROJECTS

WageRange

Created an Android app called 'WageRange' which calculates salary ranges. (Ex. If a user chooses the option 'Hourly', then they can enter the hourly wage of an employee, the number of hours they work a day, and the number of days they work a week to get their weekly, monthly and yearly wage ranges as a result.) App is available on Google Play Store for free. The app is written in Java.

CourseLogger

Created a web application called 'CourseLogger', which can be found at, <http://www.chrismomdjian.com/PDO/index.php> that allows me to keep track of the courses which I have taken for my Associates degree in Web Development. The application holds data about each course such as completion status, grade received, number of units, among other things and employs basic CRUD functionality. Data is stored in a MySQL database and is powered by PHP on the back-end.

Web Portfolio

Personal portfolio which can be found at <http://www.chrismomdjian.com>. Website displays my current projects and links to each project on the home page as well as descriptions about me and my technical skills. The site was built with HTML5, CSS3, JavaScript, PHP and the Bootstrap framework.
